2021 Households by Disposable In- come	2 Minute Drive Time	10 Minute Drive Time
<\$15,000	33.6%	17.8%
\$15,000—\$24,999	16.7%	13.1%
\$25,000—\$34,999	7.8%	10.1%
\$35,000-\$49,999	10.1%	13.8%
\$50,000—\$74,999	14.9%	19.0%
\$75,000—\$99,999	6.0%	9.8%
\$100,000—\$149,999	6.2%	10.6%
\$150,000+	4.9%	6.0%
Median Disposable Income	\$24,784	\$43,720

Note: Disposable income is after-tax household income.

Note: The Spending Potential Index is household-based, and represents the asset value or amount spent for a product or service relative to the national average of 100. Values higher than 100 indicate spending above the national average, and values lower than 100 indicate lower spending than the national average.

*This ratio indicates the number of employees working in the area versus the number of residents. A higher ratio indicates more commercial presence.

"Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. The Leakage/Surplus Factor measures the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. The NAICS is used to classify businesses by their primary type of economic activity.

ESRI Tapestry Segmentation Area Profile: 2 Min Drive

Neighborhood Quick Facts*

Walk Score: 87

• Transit Score: 69

• Bike Score: 73

* The Walk Score is a measure between 0 and 100 that measures the ease of accessing amenities and running errands by walking. For more information, see http://www.walkscore.com/

TAPESTRY SEGMENT DESCRIPTIONS

Social Security Set

Social Security Set is an older market located in metropolitan cities across the country. One-fourth of householders here are aged 65 or older and dependent on low, fixed incomes, primarily Social Security. In the aftermath of the Great Recession, early retirement is now a dream for many approaching the retirement age; wages and salary income in this market are still earned. Residents live alone in low-rent, high-rise buildings, located in or close to business districts that attract heavy daytime traffic. But they enjoy the hustle and bustle of life in the heart of the city, with the added benefit of access to hospitals, community centers, and public transportation.

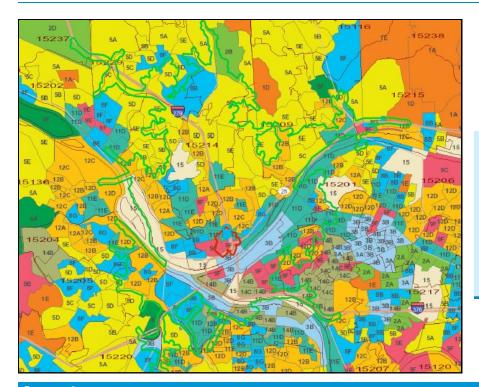

Set to Impress

Set to Impress is depicted by medium to large multiunit apartments with lower than average rents. These apartments are often nestled into neighborhoods with other businesses or single-family housing. Nearly one in three residents are 20 to 34 years old, and a large portion are single person nonfamily households. Although many residents live alone, they preserve close connections with their families. Many work in food service while they are attending college. This group is always looking for a deal. They are very conscious of their image and seek to bolster their status with the latest fashion. Set to Impress residents are tapped into popular music and the local music scene.

Metro Renters

Residents in this highly mobile and educated market live alone or with a roommate in older apartment buildings and condos located in the urban core of the city. This is one of the fastest growing segments; the popularity of urban life continues to increase for consumers in their late twenties and thirties. Metro Renters residents income is above the US average, but they spend a large portion of their wages on rent, clothes, and the latest technology. Computers and cell phones are an integral part of everyday life and are used interchangeably for news, entertainment, shopping, and social media. Metro Renters residents live close to their jobs and usually walk or take a taxi to get around the city.

They are very conscious of their image and seek to bolster their status with the latest fashion. Set to Impress residents are tapped into popular music and the local music scene.

Traditional Living

Residents in this segment live primarily in low-density, settled neighborhoods in the Midwest. The households are a mix of married-couple families and singles. Many families encompass two generations who have lived and worked in the community; their children are likely to follow suit. The manufacturing, retail trade, and health care sectors are the primary sources of employment for these residents. This is a younger market—beginning householders who are juggling the responsibilities of living on their own or a new marriage, while retaining their youthful interests in style and fun.

Social Security Set

Social Security Set is an older market located in metropolitan cities across the country. One-fourth of householders here are aged 65 or older and dependent on low, fixed incomes, primarily Social Security. In the aftermath of the Great Recession, early retirement is now a dream for many approaching the retirement age; wages and salary income in this market are still earned.
